

Build your own spacecraft!

How would you like to be the chief engineer for an important NASA mission? In this activity, you get to design the latest and greatest space rocket from recyclable materials. Your rocket could take pictures of planets in our solar system, keep an eye on our sun, or even find planets elsewhere in the universe!

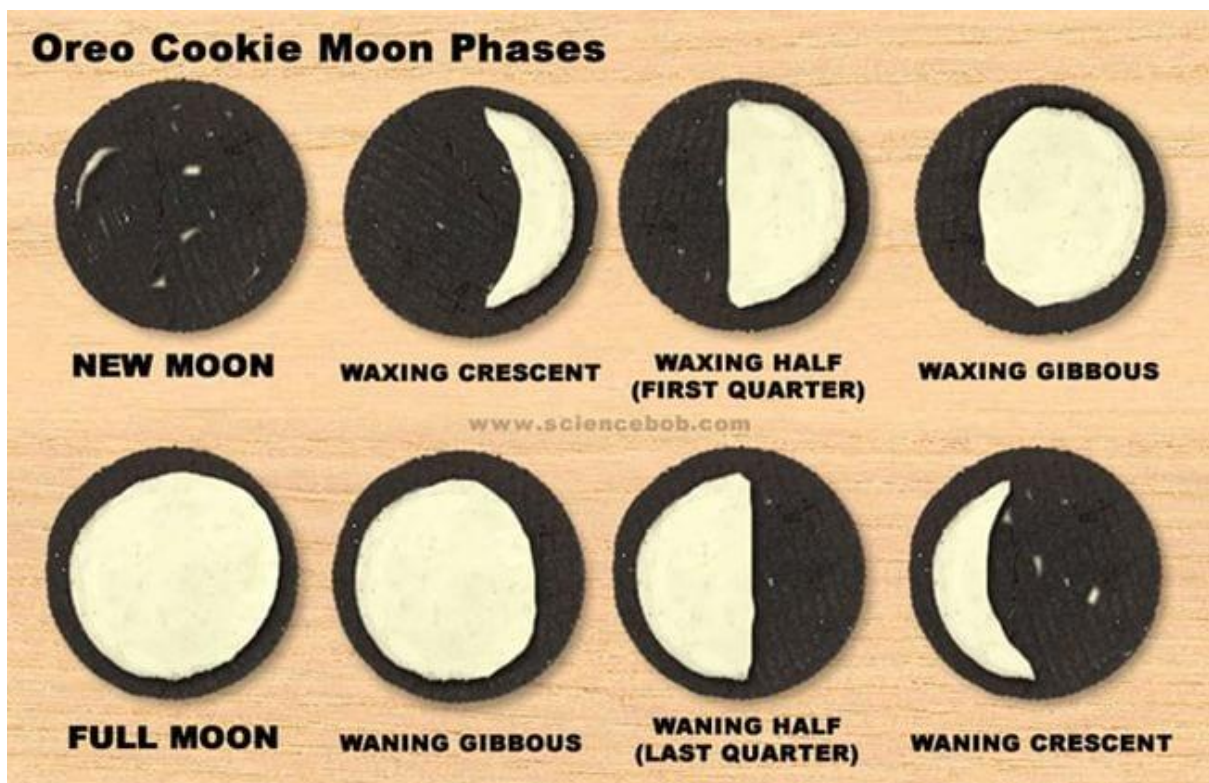

So have fun inventing and don't forget to post pictures of your creation.

Biscuit Moon Phase Challenge

Have a go at making the phases of the moon with Oreo biscuits or Jaffa Cakes.

A great excuse to eat some treats.

Don't forget the pictures.

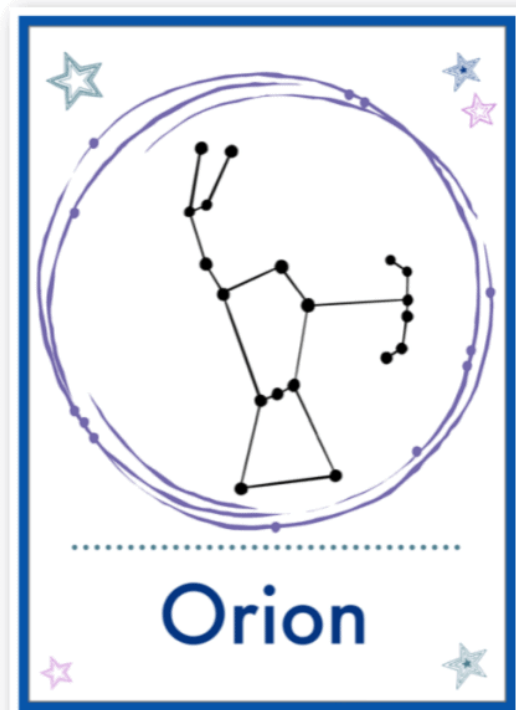

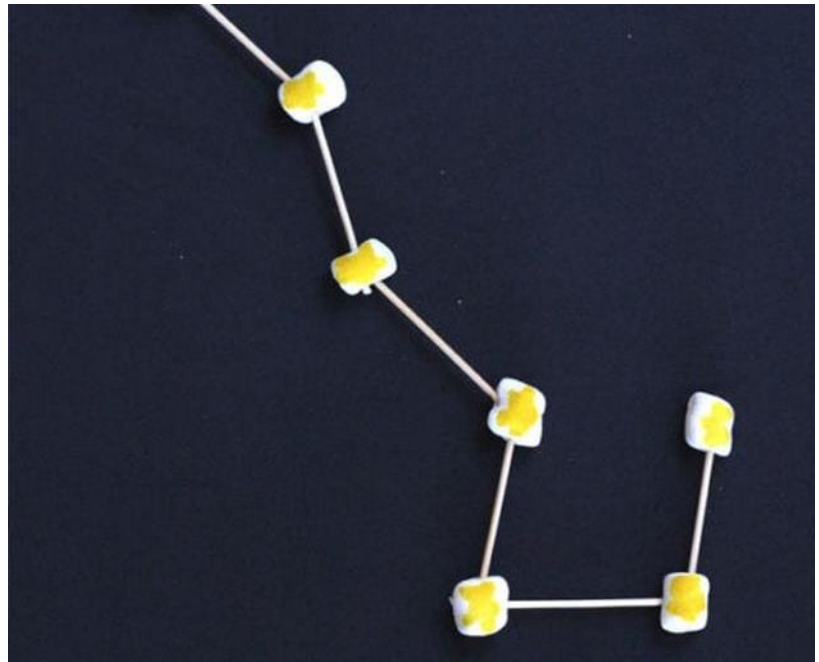

Create a Constellation picture

You could use marshmallows and cocktail sticks, or stickers and chalk or pen.

Plot your stars and then join them up.

A couple of constellations have been given for you below.

Build a LEGO moon rover

Can you create a moon rover, a satellite or space station from lego? How creative are you? Anything goes.
